**QUESTION 1**

You are trying to record the process that a hospitality facility uses to check in patients. You need to identify bottlenecks and variations in the process. What should you use?

- A. Process Advisor
- B. Flow checker
- C. AI Builder
- D. Solution checker

Correct Answer: A

QUESTION 2

You need to set up a policy for the developer to perform desktop flow testing.

Which two actions should you do? Each correct answer presents a part of the solution.

NOTE: Each correct selection is worth one point.

- A. Create a tenant-level Microsoft Power Platform data loss prevention (DLP) policy.
- B. Add the custom connector to the Non-business connector group.
- C. Create a Microsoft Power Platform data loss prevention (DLP) policy in the development environment.
- D. Add the custom connector to the Business connector group.
- E. Move the SharePoint connector to the Non-business connector group.

Correct Answer: CE

QUESTION 3**DRAG DROP**

You are designing automation processes.

You need to configure the run mode for each automation scenario.

Which run modes should you use? To answer, drag the appropriate run modes to the correct scenarios. Each run mode may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

NOTE: Each correct selection is worth one point.

Select and Place:

Run modes

Attended

Unattended

Answer Area

Scenario

Automate the transfer of data from a file you save locally in an active user session to an application installed on your machine.

Run mode

Run 10 credit card checks in parallel in a system without API.

Run mode

Trigger an automation to update data in a customer relationship management app after an approval process completes.

Run mode

Correct Answer:

Run modes

Answer Area

Scenario

Automate the transfer of data from a file you save locally in an active user session to an application installed on your machine.

Run 10 credit card checks in parallel in a system without API.

Trigger an automation to update data in a customer relationship management app after an approval process completes.

QUESTION 4

You plan to use a cloud flow.

The flow must be contained within a solution.

You need to add the cloud flow to a solution.

Solution: Create an instant cloud flow outside of a solution. Add the cloud flow into a new unmanaged solution.

Does the solution meet the goal?

A. Yes

B. No

Correct Answer: B

QUESTION 5

DRAG DROP

You develop a desktop flow for a company.

You need to ensure that another user can modify the flow.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the order.

Select and Place:

Actions

Add people and select the co-owner access type.

Select a flow and select **Share**.

Navigate to <https://flow.microsoft.com>.

Launch Power Automate for desktop.

Add people and select the user access type.

Answer area

1

2

3

Correct Answer:

Actions

Launch Power Automate for desktop.

Add people and select the user access type.

Answer area

1

Navigate to <https://flow.microsoft.com>.

2

Select a flow and select **Share**.

3

Add people and select the co-owner access type.

QUESTION 6

DRAG DROP

You need to implement a solution to manage the priority of incoming orders.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Edit the desktop flow.

Edit the cloud flow.

Modify the **Run a flow built with Power Automate for desktop** action.

Change the desktop flow's priority to High.

Set the priority value based on the volume for an order.

Set the desktop flow's queue order based on the volume for an order.

Select the desktop flow and then select **Move to top**.

Answer Area

Three empty green rectangular boxes for providing an answer.

Correct Answer:

Actions

Edit the desktop flow.

Edit the cloud flow.

Modify the **Run a flow built with Power Automate for desktop** action.

Change the desktop flow's priority to High.

Set the priority value based on the volume for an order.

Set the desktop flow's queue order based on the volume for an order.

Select the desktop flow and then select **Move to top**.

Answer Area

Edit the cloud flow.

Modify the **Run a flow built with Power Automate for desktop** action.

Set the priority value based on the volume for an order.

1.

Edit the cloud flow.

2.

Modify the Run a flow built with Power Automate for desktop action.

3.

Set the priority value based on the volume for an order.

To implement a solution to manage the priority of incoming orders, you need to perform three actions in sequence:

1.

Edit the cloud flow that triggers the desktop flow. This is where you can define the logic for setting the priority value based on the volume for an order¹.

2.

Modify the Run a flow built with Power Automate for desktop action in the cloud flow. This is where you can pass the priority value as a parameter to the desktop flow¹.

3.

Set the priority value based on the volume for an order in the desktop flow. This is where you can use the priority value as a dynamic content to determine how the desktop flow will run on the target machine¹.

QUESTION 7

You develop a Microsoft Power Platform solution for a client.

You must test the solution in a user acceptance testing (UAT) environment before deploying the solution to production.

You must ensure that the configurations for the UAT and production environments are identical.

You must minimize administrative effort.

You need to ensure that the environments are identical.

Which Microsoft Power Platform feature should you use?

- A. Copy environment
- B. Edit environment properties
- C. Move environment
- D. Reset environment
- E. Restore environment

Correct Answer: A

QUESTION 8

DRAG DROP

A company has a customer relationship management (CRM) application that runs on a virtual machine (VM) in Azure.

The solution must automatically extract common invoice data from documents sent as email attachments and save the data to the company's CRM application.

You need to design the solution.

In which order should you perform the actions? To answer, move all actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

Create a desktop flow.

Create an instance of the Invoice processing AI Builder model.

Define input variables in the desktop low.

Define the logic in the desktop flow to write data to the CRM.

Create a cloud flow that extracts information from the model and triggers the desktop low.

Answer Area

Correct Answer:

Actions

Answer Area

Create an instance of the Invoice processing AI Builder model.

Create a cloud flow that extracts information from the model and triggers the desktop low.

Create a desktop flow.

Define input variables in the desktop low.

Define the logic in the desktop flow to write data to the CRM.

QUESTION 9

HOTSPOT

You create an environment for a company. You need to configure security to meet the company's requirements and follow the principle of least privilege. Which security roles should you assign? To answer, select the appropriate options in the

answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Requirement

A user must be able to register new machines in the environment.

	▼
Environment Maker	
Desktop Flows Machine Owner	

A user must be able to share their machine with another user.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine User Can Share	

A user must be able to run desktop flows on a registered machine.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine User Can Share	

A user must be able to create a machine group and add machines to the machine group.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine Owner	

Correct Answer:

Answer Area

Requirement

A user must be able to register new machines in the environment.

	▼
Environment Maker	
Desktop Flows Machine Owner	

A user must be able to share their machine with another user.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine User Can Share	

A user must be able to run desktop flows on a registered machine.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine User Can Share	

A user must be able to create a machine group and add machines to the machine group.

	▼
Environment Maker	
Desktop Flows Machine User	
Desktop Flows Machine Owner	

QUESTION 10

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while

others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You are creating a cloud flow that will use two Update Row actions to interact with Microsoft Dataverse. Neither of these actions are dependent on each other.

You must minimize the amount of processing time required to complete the flow.

You need to implement the actions in the cloud flow.

Solution: Create two sequential Update Row actions.

Does the solution meet the goal?

- A. Yes
- B. No

Correct Answer: B

QUESTION 11

You create several desktop flows. Each flow will run on a single user's device.

You need to determine how Power Automate will orchestrate the flows.

Which three rules will Power Automate apply? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. All the flows are run simultaneously.
- B. The first flow runs on the target device based on the priority and the time requested.
- C. The remaining flows are queued.
- D. The first flow runs on the target device based on Next to run status and time requested.
- E. The next flow will run when each run completes based on the priority and the time requested.
- F. The first and last flows run based on the priority and the time requested.

Correct Answer: BCE

QUESTION 12

You need to resolve the document processing issue.

Which two components should you verify? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. The document processor flow is turned on.
- B. The email importer flow is set to include attachments.
- C. The document automation validator flow includes business logic.
- D. The shared mailbox is set in the email importer flow.

Correct Answer: AD

QUESTION 13

DRAG DROP

You plan to implement a data loss prevention (DLP) policy for a production environment.

You need to define the policy.

Which four actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Select and Place:

Actions

- Define the scope and add all environments to the policy.
- Classify and assign connectors.
- Review and create the policy.
- Define the scope and add the environment to the policy.
- Name the policy.
- Add new tenant rules.

Answer Area

[Four empty green boxes for writing the answer]

Correct Answer:

Actions

Define the scope and add all environments to the policy.

Add new tenant rules.

Answer Area

Name the policy.

Classify and assign connectors.

Define the scope and add the environment to the policy.

Review and create the policy.

To create a DLP policy, you need to follow these steps1:

Name the policy.

Classify and assign connectors.

Define the scope and add the environment to the policy. (This step doesn't apply to environment-level policies)

Review and create the policy.
